The Rs 513 Bus has been optimized to reduce the full-vehicle weight by reducing weight of from numerous components, brackets, and the vehicle’s tube structure. Design optimization techniques were employed to minimize the thickness of the tube structure to drive down the weight of the frame without compromise to safety.

Category: **Full Vehicle**

Application: **Rs 513**

**Weight Savings:** 19lbs removed when compared to previous model

**Methodology:** Topology Optimization
